

alseda LISA – Objectleasing & Financing

alseda LISA is a leasing solution based on standard SAP S/4HANA applications and complemented by intelligent leasing functions. The solution enables banks and companies to offer their customers a comprehensive solution for mobile object leasing and supports common business processes from the lessor perspective.

The individually configurable financing products of the LISA solution enable simple, new financing options in the leasing environment.

OVERVIEW

alseda LISA offers the possibility to map object leasing and object financing in SAP S/4HANA. For this purpose, existing SAP applications were enhanced with smart functions and automated applications.

With the goal of achieving a high level of digitalization, frameworks and tools were developed that ensure quick and easy integration into an existing customer architecture.

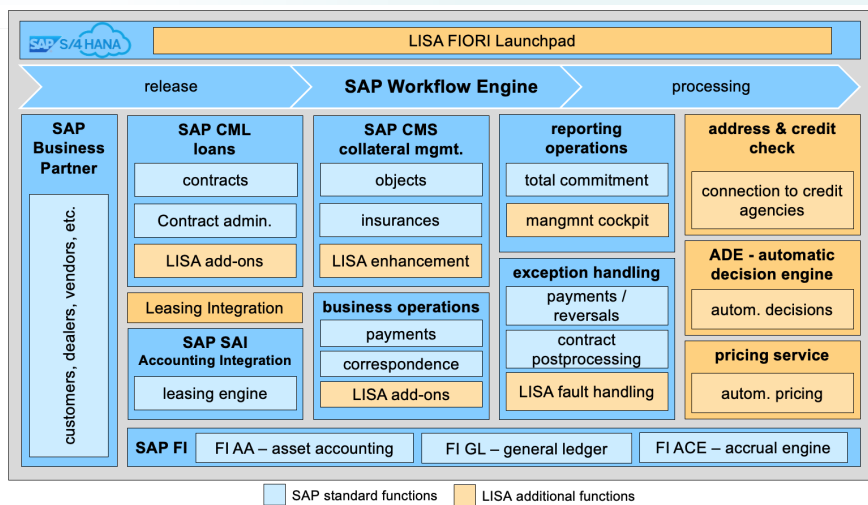

By integrating services, the lessor can offer a fully comprehensive leasing package and automate complex interaction processes with lessees and third parties (e.g. dealers).

PRECONFIGURED PRODUCTTYPES

- Operative Leasing
- Capital Leasing
- Installment loans
- Credit line (master agreement)

THE MOST IMPORTANT FUNCTIONS

- LISA is based on the latest SAP S/4HANA technology
- The LISA solution is pre-configured (RDS - Rapid Deployment Solution), enabling faster, easier and more cost-effective implementation. It is based on best practices that focus on independent, business-specific requirements
- The entire solution can be deployed in the cloud or "on premise"
- The application is adapted to the processes from the lessor's point of view
- All types of evaluations can be performed in LISA in real time on the SAP S/4HANA platform
- The connection to credit agencies (Creditreform, Schufa, etc.) is made via the alseda software product S2S

- Leasing processes are fully mapped via SAP Business Workflow (high degree of automation)
- Enhancements are possible without modification via the SAP Business Rules Framework plus (BRF+)

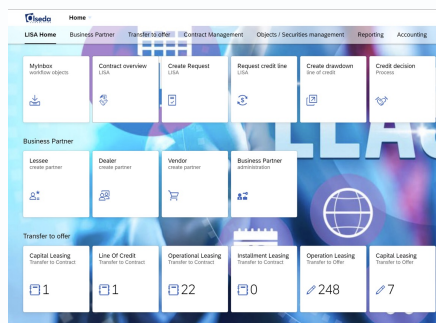

INTEGRATION IN SAP S/4HANA

The alseda LISA solution is a package of functions that consists of the following components:

- Own SAP Fiori Launchpad for the leasing solution
- Integration into SAP Business Workflow / MyInbox (automatic decision engine)
- Full integration with SAP Business Partner
- Framework for automated price calculation
- Use of SAP CML for mapping contracts and conditions
- Objects, insurances and services are managed and evaluated in SAP CMS
- Accounting mapping of leasing transactions via integration in the SAP Leasing Engine (SAI)
- Direct integration with SAP FI General Ledger and Asset Accounting

alseda LISA: Advantages at a glance

- Ready-to-run solution for your leasing business
- High automation through workflow integration and automated decision components
- Integration with SAP S/4HANA and SAP Cloud for Banking (C4B)
- Significant reduction of project run times
- Reduction of project risk through a ready-to-use and tested configuration
- All documentation already available
- Delivery by proven leasing specialists
